

ECHOES QUESTS

Echoes Quests are eLearning programmes for trainees involved in VET, pupils and students presenting exercises on different aspects of working with post-industrial landscapes in schools and colleges or in workplace based training.

VET trainers or teachers can register in order to get access to training notes on each Echoes Quest in <http://www.echoesquests.eu/> and click the "Teacher" button and register.

Teachers and trainers who have completed a training period will be allowed to publish their own Echoes Quests. Click here to find out more <http://echoes-vet.eu/> Echoes Quests eLearning modules give detailed exercises for trainers wishing to incorporate the material into their programmes or after a period of instruction create their own app following a similar theme. The Echoes Quest will be created in Portuguese, German, Swedish and English.

The Teaching material allows the trainer or teacher answer such questions as: What are the trainees doing? Why are they doing it? What do we expect them to get out of it? It gives the trainer or teacher a step by step description of the training process supported by videos, documents and web links. An assessment framework is also supplied.
